

My child has been exposed to COVID-19. What happens next?

KEEP YOUR CHILD AT HOME IF...

- Your child has tested positive for COVID-19.
- Your child has had contact with someone who is positive for COVID-19.
- Your child has been told to stay out of school by the Shelby County Health Department (SCHD), SCS Contact Tracing Team, or your child's principal.

WHEN CAN HE/SHE RETURN?

- If a student tests positive for COVID-19, he/she will not be permitted to return to the school building until the specific number of days required by the CDC/Health Department has been met, even if they do not develop symptoms.
- Once the specified time period is over, these individuals may return to school with documentation of clearance.
- For additional questions, contact your child's school.

ACADEMIC INSTRUCTION

- If students are not permitted to return to the school building or when schools are closed, students will participate in **virtual asynchronous learning** (independent study).
- In some cases, additional academic arrangements may be necessary.

STOP THE SPREAD OF GERMS

Stay at least 6 feet
apart from others.

Cover your cough or sneeze with a
tissue, then throw the tissue in the
trash and wash your hands.

When in public or around
others, wear a face mask
covering the nose and mouth.

Avoid touching
your face.

Clean and disinfect
frequently touched
objects and surfaces.

Stay home when you are sick,
except to get medical care.

Wash your hands often with soap
and water for at least 20 seconds.

VISITOR GUIDELINES

**Please do not enter
if any of the following apply to you:**

- Have a fever, cough or shortness of breath
- Known exposure to someone diagnosed with COVID-19
- Have travelled internationally in the last 14 days

ADDITIONAL GUIDANCE FOR FAMILIES

- If your child is out of school due to illness, please notify the school.
- Parents should keep their contact information up-to-date with their schools to ensure they receive notifications.
- Monitoring student symptoms, wearing of masks, social distancing when possible, frequent washing of hands, the use of sanitizer, and cleaning protocols will all reduce the chances of COVID-19 passing from one person to another.
